Professional Summary

Aspiring **Specialist Programmer** and **Digital Specialist Engineer** graduating in 2026 with hands-on experience in software programming, Full Stack Development, Data Engineering, Digital Analytics, Real-Time Telemetry Systems, Data Science, and Cybersecurity. Skilled in Java, JavaScript, Python, React.js, Node.js, Express.js, SQL, PostgreSQL, and MongoDB. Experienced in building scalable full-stack applications, REST APIs, ETL pipelines, backend programming systems, and innovative digital solutions. Strong foundation in Data Structures, Object-Oriented Programming, DBMS, Operating Systems, and problem-solving.

Technical Skills

Programming Languages: Java, JavaScript, Python, SQL, C++, C

Frontend Development: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend Development: Node.js, Express.js, REST APIs, JWT Authentication

Databases: PostgreSQL, MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman, LabVIEW, MQTT, Power BI

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Data Science, Cybersecurity

Programming Concepts: API Development, Backend Programming, ETL Pipelines, System Design

Education

B.Tech – Computer Science and Business Systems Expected Graduation: June 2026
St. Vincent Pallotti College of Engineering and Technology, Nagpur
CGPA: 8.69/10

Experience

Junior Software Developer Jul 2025 – Jan 2026
PugArch Private Limited

- Developed Python-based programming pipelines to collect and process **10,000+ structured records**.
- Built ETL workflows for extraction, transformation, and database integration.
- Integrated MongoDB, MySQL, and PostgreSQL for scalable structured storage.
- Developed React.js and Next.js applications for digital business solutions.
- Reduced manual preprocessing effort by **60%** through automation.

Data Analytics Intern Aug 2025 – Oct 2025
Infosys

- Analyzed datasets using SQL, Excel, and Power BI for business insights.
- Built dashboards for analytics and business performance assessment.
- Improved reporting workflows and data quality.
- Reduced reporting turnaround time by **40%** through automation.

Aerodynamics & Data Acquisition Lead Mar 2023 – Jan 2026
E-Formula AshwaRiders

- Led telemetry programming systems for Formula Bharat electric vehicle.
- Built real-time sensor pipelines for analytics and monitoring.
- Developed dashboards tracking speed, thermal, and battery metrics.
- Improved engineering decisions using telemetry analytics and performance data.

Projects

CrisisNet – Disaster Response Coordination Platform
React.js — Node.js — MongoDB — Socket.IO

- Built a disaster response platform for emergency request handling and shelter coordination.
- Developed real-time communication system for rescue teams and volunteers.
- Integrated live location tracking for resource allocation.
- Improved emergency response coordination using real-time backend systems.

Real-Time Vehicle Telemetry and Digital Analytics System
Python — LabVIEW — PostgreSQL — MQTT — ETL

- Built telemetry system processing **1000+ sensor records per session**.
- Designed ETL workflows for telemetry analytics and structured storage.
- Integrated PostgreSQL for historical data analysis.
- Built dashboards for anomaly detection and vehicle performance assessment.

DL-SEC – Cybersecurity Anomaly Detection System
Python — Machine Learning — CNN-LSTM

- Developed cybersecurity anomaly detection pipeline using CNN-LSTM.
- Built monitoring workflows for anomaly tracking and analysis.
- Improved anomaly detection efficiency using machine learning optimization.

Pinit – Intelligent Message Pinning Extension
JavaScript — Chrome Extension API — DOM

- Built intelligent message pinning system for AI chat platforms.
- Solved DOM virtualization issues using contextual fingerprinting.
- Improved digital content organization and retrieval efficiency.

CivicTrack – Public Issue Reporting System
Java — Spring Boot — SQL — REST APIs

- Built a public issue reporting platform for citizens to report road damage, water leakage, and electricity problems.
- Developed REST APIs for issue creation, status tracking, and department allocation.
- Implemented structured SQL database design for issue lifecycle management.
- Improved complaint tracking efficiency using backend automation.

Achievements & Leadership

- Led Aerodynamics and Data Acquisition for Formula Bharat vehicle development.
- Built production-oriented telemetry programming systems.
- Developed innovative software systems across full stack, telemetry, and cybersecurity domains.

Certifications

- Data Analytics Internship Certification – Infosys
- MERN Stack Web Development – Edunet
- AI-ML and Green Technology – Edunet
- Data Structures and Algorithms in Java
