Learning Microsoft 365 Copilot

Abhishek Dass

Flight Software Developer @ Estonian Student Satellite | Formula Student | Software Developer | Python, MERN, SQL, ML, Data Science, Data Analytics | CS Graduate
Greater Nagpur Area

Summary

Computer Science graduate (2026) specializing in software development and data analytics, with hands-on experience across Python, SQL, React, Node.js, Power BI, and machine learning.
I'm currently a Flight Software Developer on SUTS, a CubeSat mission by the Estonian Student Satellite Foundation launching in 2028 — working with an international student team on mission-critical satellite systems. Previously, I built full-stack applications (MERN) and web scraping/data pipeline tools as a Junior Software Engineer at PugArch Technology, and worked on data analytics during an internship at Infosys. Outside of software, I spent two years as Aerodynamics & Data Acquisition Lead for E-Formula AshwaRiders, where our team placed AIR 8 overall at Formula Bharat 2024 against 40+ teams — leading telemetry systems and data acquisition for the car. I also co-authored a research paper on CNN-LSTM based anomaly detection (DLSEC). I'm looking for full-time roles in software development or data analytics/data science, where I can apply strong fundamentals in code, data, and systems thinking to real engineering problems. Open to connecting — always happy to talk shop.

Experience

Estonian Student Satellite
Flight Software Developer
July 2026 - Present (1 month)
Estonia

Contributing to SUTS, a CubeSat mission by the Estonian Student Satellite Foundation (launch: 2028), developing flight software for mission-critical satellite systems as part of an international student team.

Hixaa Technologies Private Limited
LabView Intern

January 2026 - July 2026 (7 months)
Nagpur

Developed LabVIEW-based applications for hearing based medical instrument, simulator for metro and software licensing for products during a 6-month internship.

PugArch Technology Pvt. Ltd.

Junior Software Engineer

July 2025 - February 2026 (8 months)
Maharashtra, India

• Developed SaafAI, a web data scraper for extracting targeted data to build a comprehensive database.
• Created a fully functional map integrated with the database from the web scraper project.
• Collaborated with team members to enhance project efficiency and data usability.

E FORMULA ASHWA RIDERS

2 years 10 months

Aerodynamic and Data acquisition head

May 2025 - February 2026 (10 months)
India

-Led aerodynamics and data acquisition strategy for the team's Formula-style race car, contributing to an AIR 8 overall finish at Formula Bharat 2024 against 40+ competing teams
-Designed and implemented vehicle telemetry systems to capture and analyze real-time performance data

Inventory Manager

June 2024 - February 2026 (1 year 9 months)
Nagpur

Managed procurement and inventory tracking for team parts/components, ensuring availability of critical materials for build and competition timelines

Data acquisition head

June 2024 - February 2026 (1 year 9 months)
India

Built and maintained data acquisition pipelines for vehicle telemetry, enabling the engineering team to make data-driven setup decisions during testing and competition

Jr. Aerodynamic Design Engineer
May 2023 - February 2026 (2 years 10 months)
Nagpur

Designed and analyzed aerodynamic components for the team's race car using SolidWorks, Fusion360, Ansys etc.

Education

St. Vincent Pallotti College of Engineering & Technology
Bachelor of Engineering - BE, Computer Science · (November 2022 - June 2026)
